

THE GLEICHEN CALL

VOLUME XXXII No. 12

GLEICHEN, ALBERTA, WEDNESDAY JUNE 7, 1939

SUBSCRIPTION \$2.00 PER YEAR

BOARD OF TRADE TO DISCUSS PARK AND SWIMMING POOL

At the next meeting the Gleichen Board of Trade is taking up the question of carrying on with the improvements on the swimming pool at the lake side or entirely abandoning the same.

During a period of years the Board of Trade has spent hundreds of dollars on that project in conjunction with the Athletic Club. Some fifteen hundred trees were planted in an attempt to carry out a plan designed by the provincial town planning officer with the idea of eventually having there a real park with good drive-ways, a swimming pool with dressing rooms, diving boards, trees, picnic grounds, etc.

What is there left of it today? Not very much. The dressing rooms are closed; the diving board has been taken down; officially swimming is suspended; a few living trees are struggling for existence. That is all and why?

One of the main reasons is no doubt the hail storm in 1935, with its terrific destruction. But aside from this, there must be others. Why can other towns have these things and not Gleichen with its wonderful facility the pressure irrigation system? But, without further discussing the reasons behind our failure of the past, let us examine at least three proposals which are to come up for debate at the Board of Trade meeting and which it is hoped is to be followed by some action.

Proposition No. 1. Carry on with the present location, replanting, reopening the pool, etc.

In favor of this plan: A few acres lake; big spacious grounds which could be made into a wonderful park; dressing rooms already located; shallow bathing as well as deep swimming, already established.

Against this plan: Large under-estimates; rather costly; location for pedestrians, especially on hot days. No drinking water; vandalism; difficult to supervise; no sewer facility; muddy bottom.

Proposition No. 2. Establishing a park ground on the site known as the Champagne grounds with a view to establishing a proper cement pool with drainage into the sewer system, access to drinking water, picnic grounds, playground, drive ways, walks, etc.

In favor of this plan: Central location, easy access for fifteen or twenty minute recreation, not too large a park for proper caretaking, water, etc. Town drainage is available. Sewage available. Dressing rooms would be moved to this location. Could be fenced in, no vandalism, being in sight. Proper pool could be built with proper sanitation, disinfecting the water. Life guard only required for certain hours when pool open to public, otherwise, locked. Better location for passing tourists.

Against this plan: Aside from the fact that it will take time and funds to establish a proper swimming pool there is no apparent disadvantage to this proposition, as a park or playground. The pool itself would have to be a community undertaking.

Proposition No. 3. To abandon all plans of recreation park or swimming pool; in other words just simply quit!

Should either proposition No. 1 or 2 appeal to the citizens of Gleichen, it would mean that all would have to put their shoulders to the wheel to make a success of it.

IT CAN BE DONE!

A membership campaign for the Board of Trade is now on and every responsible citizen who has the welfare of the town of Gleichen at heart should join this organization.

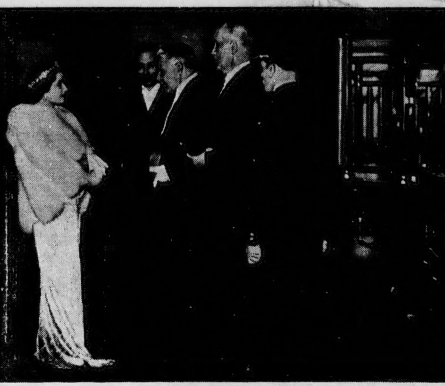

Let's all get together and make Gleichen a better place to live in.

W. SUTHERLAND, President, Gleichen Board of Trade.

The next session of the Board of Trade will be held on Monday, June 12th and will take the form of a banquet to which the ladies will be invited. The discussion of the above will then take place. A special speaker for the occasion will be heard.

Mrs. M. Brown left Sunday for Bow Island where she will spend some time visiting friends.

Sir Edward Beatty Chats with King and Queen

Just before leaving Montreal, The Royal Majesties King George VI and Queen Elizabeth met and shook hands with several directors of the Canadian Pacific Rail-

way. They are seen here chatting with Sir Edward Beatty, G.B.E., K.C., J.L.D., chairman and president, Canadian Pacific Railway, and Sir Herbert Holt. Other di-

rectors presented by Sir Edward were Sir Charles Gordon, G.B.E., D. C. Coleman, vice-president, Brig.-Gen. F. S. McInnes, C.M.G., Ross McMaster and M. W. Wilson.

FOUR BALL CLUBS ORGANIZE SOFTBALL LEAGUE

A soft ball league was formed recently and the schedule will get underway this coming Sunday. The four clubs are Meadowbrook, the recent holders of the Agri-W Trophy, Gleichen, 22nd Battery and a new junior club the U.F.A. The following is the schedule:

June 11—U.F.A. at 22nd Battery and Gleichen at Meadowbrook
June 14—22nd Battery at Gleichen and Meadowbrook at U.F.A.
June 16—U.F.A. at Gleichen
June 18—22nd Battery at Meadowbrook.

The rest of the schedule will be published next week.

THE WORLD OF WHEAT

BY H. G. L. STRANGE
Director, Research Department
Searle Grain Company, Limited

The time for summer following, that most essential operation of western agriculture, is with us again.

Summerfallowing is an ancient practice. In most countries it is practiced only to destroy weeds, for weeds undoubtedly are a most effective means of depriving the soil of precious moisture, and so causing a heavy loss in crop yield. In Western Canada, however, summerfallowing is usually done for an even more important reason, which is to conserve an extra year's supply of moisture, and so gain a better assurance of a crop the following year.

Records reveal that the best rains in our prairie provinces fall as a rule early in June. The earlier, therefore, that summerfallowing can be done, obviously the more moisture will be conserved, and also of course early cultivation means that less weeds will grow.

Ploughing, unfortunately, while it kills weeds, is a great dissipator of moisture. Wherever it is possible, therefore, surface cultivation only of the summerfallow, either with the one way disc, or the duckfoot cultivator, should be done. For this method will conserve more moisture than ploughing. If, however, a field is infested with well-rooted, perennial weeds, then the plough may have to be used, but in general ploughing should be avoided if at all possible.

Following factors have tended to raise price: Greece purchases Argentine wheat. Decrease in 1939 Latin spring wheat acreage. Export reduced wheat acreage in Argentina. German wheat condition reported to be irregular. Storms damage Italian vineyards and crops. New Canadian gold clauses set.

Following factors have tended to lower price: Floating stocks of wheat

and flour enlarging rapidly. Stocks of wheat and rye in Germany reported to be double that of last year. Good general rains relieve dryness in Argentina. Thrashing begins in U.S.A. 1939 Algerian wheat and barley estimates larger than 1938. Decrease in Oriental wheat purchases. Condition Canadian wheat crop approximately normal.

ITEMS OF INTEREST OF THE TOWN AND DISTRICT

Miss P. Halstead passed her Normal School examinations last week.

There will be a quiz contest with the picture show tomorrow night—Thursday.

Fred Jones represented Gleichen at Edmonton during the Royal Visit. While there he attended the Legion meeting.

At the baseball tournament at Arrowwood last week Arrowwood won first prize, Gleichen second and Standard third.

Saturday night a half inch of rain fell and on Monday more rain came down gladdening the hearts of every one.

Bill Brown, the local oil king has been in a hospital for the past couple of weeks recovering from an operation.

Louie Gies who came from Tyne some three weeks ago died at 75 after a long illness. The funeral took place Thursday afternoon.

Major J. J. Sutherland officiating.

Saturday night a number of young people held a surprise party at the river for Robert Black. Although rain forced an early retreat, a good time was had by all. Robert was presented with a fine bathing suit.

COMING EVENTS

June 9—High School ball team bridge and crib party, 2 hours; singing, good music, lunch. Admission 25c.

As a result of many requests from women in the province the Provincial Chapter of Alberta's Imperial Order Daughters of the Empire has decided to open registration for emergency service to the empire. Anyone wishing to register should communicate with Mrs. T. Harold Mackie, 1714, 184th Street, Edmonton, stating which of the following services she wishes to register under: nursing, first aid, occupational therapy, motor driving, stenography, typing, bookkeeping, secretarial work, sewing, knitting, cooking, canning, farm help.

THE WEEK IN EDMONTON

(By Special Correspondent)

Among the more pleasing sights that greeted the eyes of Their Majesties as they entered the legislative building was the gorgeous display of blossoms and foliage landed around a flood lit, playing fountain in the rotunda beneath the dome. It was a thing of beauty, and all day Wednesday and Thursday visitors to the building paused to admire this lovely tribute to the Royal Couple.

It was a tribute to the Alberta home maker, too, in that the great masses of blossoms were composed of what surely must be the frailest emblem of every Canadian woman—the plucky, ubiquitous geranium.

Geraniums of deep red, full and pale pink, with white leafed varieties provided the main theme of the display. With them were woodland ferns at the water's edge, begonias, two-coral, salvia and pink geraniums. Colored flood-lights were hidden among the foliage of red angel-wing, and nasties and lillies were bunched up around the wheels.

In the tank beneath the fountain, against a background of green and stone, were personal representatives of one of Alberta's native industries—fish. They were live perch, selected for the job because of their hardy nature or spectacular fish, though excellent battles in their native waters, could not stand the strain of a few hours of chlorinated city water. So the common perch were privileged to appear before Their Majesties.

At the east side of the rotunda, a splendid exhibit of Alberta furs was on display. Prepared by the game branch of the department of agriculture, the furs included timber wolf, beaver, badger, mink, lynx, buffalo, martin, ermine, silver, cross and red fox. Three mounted heads of bighorn, mountain goat and timber wolf completed the display.

Unanimity was expressed synonymously with the Royal Visit, and a number of earnest Albertans came to Edmonton to enjoy both attractions. Eight days of recreation and education are offered, including lectures in agriculture, household science and industrial scholarships and prizes worth \$250 are available to students between the ages of 18 and 25.

Interesting facts released by the department of agriculture disclose that Alberta's rural population of half a million persons live on farms numbering 101,000, and that in 1938 their production of real wealth was valued at 17,686,102.

Grain growers produced \$105,000,000 of this total. They marketed 143,000,000 bushels of wheat, 101,000,000 bushels of oats, 29,500,000 bushels of barley, rye, flax. Forty two per cent

of the wheat marketed in the first seven months of the season graded No. 1 Northern or better.

Improvement in live stock finishing was noticeable in the percentage of "best" loafs marketed—36.56 if cents as against only 6.05 per cent six years previously.

All records were broken by Alberta sugar beet growers during 1938. They produced 251,000 tons of beets, which in turn produced 1,330,000—new little return in any sugar name language.

In other branches of agriculture Alberta farmers made gains. They stood first in all wool marketing, second in sheep, swine and cattle, third in calves. Dairyman, poultryman, beekeepers and for farmers all registered fine scores for the year.

Departure of Albertans travelling clinic on its annual crusade against sickness is attracting attention. This unique enterprise is only one of many that have been established in Alberta, and the general policy of taking medicine to the people in rural areas has brought enquiries from many parts of the world.

Recently the provincial department of health was invited to assist the Dominion in the establishment of the new health division which is to open in close collaboration with the various provincial units, along the lines mapped out by Alberta.

Extension of the district nursing service, which for years has done remarkable work in pioneer areas, has also won approval. The legislature voted funds sufficient to cover the operations of 30 nurses as compared with the 13 who have carried on this great work.

In the field of health education, new records have been made by Alberta. A series of better health days will be held this summer and the health unit movement will be forwarded. Last winter the official lecturer held 213 meetings with a total attendance of 18,726 persons. Educational films have been purchased too, and in the last three years 24 reels have been shown to interested citizens of the province.

Encouraging news of the week is that during the past six months 79 joint stock companies have been registered in the province. New industries established number 31, and in addition, 14 industries report expansion programs due to the increasing demand for their products. The data is recorded in an Alberta National Yearbook in supplement to the Edmonton Bulletin.

this is Life Insurance

IN THOUSANDS OF Canadian homes, life insurance money pays the bills—helps to support widows and children—and provides for old age.

Life Insurance dollars buy the food for three square meals a day. They buy clothing and other necessities of life. They pay the rent and fuel bills to ensure warm, comfortable homes. They give children an education and a modern's care.

Each year, life insurance policy-owners and their beneficiaries in Canada receive 150 million dollars—five hundred thousand dollars every working day—twenty thousand dollars every hour.

And it is significant that more than 75% of all life insurance payments are made to living policyholders.

Life Insurance

GUARDIAN OF CANADIAN HOMES

TOWN OF GLEICHEN

All dog licenses expired on April 30th 1939. Effectives immediately any person or persons possessing or harboring a dog or bitch in the Town of Gleichen for which no 1939 license has been procured shall be liable to a fine.

Licenses are procurable at the Town office.

The Problem Of The Metis

It is not surprising that the half breeds, or Metis, of Saskatchewan have organized, held their first annual convention and drawn up a program of reforms, consisting of some 10 points to be presented to the federal government, or that as soon as they heard what was in the wind, the Metis of the other two prairie provinces expressed a desire to join forces with the Saskatchewan group and set up an organization to cover Manitoba, Saskatchewan and Alberta.

For the Metis have a very real problem and one that is even more acute than that of the farmers in the prairie provinces, the unemployed dwellers in the cities and towns or of those who are on the borderline of relief.

These others are regarded, more or less, as the wards of one or more of the three governing units of the country, but not the Metis. Up to the present the federal, provincial and municipal governments have shown a disposition to wash their hands of the half breed population. They are the unwanted child and have been treated as such.

From the first of settlement of the country the federal government has assumed and still assumes responsibility for the Indian, the original inhabitants of the country. All those who have come into the country since the days when the plains were solely occupied by the Indians, the bison and the gophers are presumed to be primarily the care of the municipalities, urban or rural, in which they reside, except when such conditions exist as to warrant the proclamation of national emergency, when the federal government or the federal and provincial governments jointly come to the rescue of the distressed in partnership with the municipalities, and in some cases and some areas without municipal assistance.

Country Dwellers

The great majority of the half breeds reside in the rural areas. In the first place because by nature they are not suited to urban existence and in the second place because they and their governments have shown a disposition to wash their hands of the half breed population. They are the unwanted child and have been treated as such.

For this reason the large majority of the Metis are still to be found in country districts and the greater number of them are squatters, building shacks on waste land and under the most primitive conditions, occupying abandoned and often enough tumble down buildings. Hence they have never been taxpayers in the municipalities in which they reside and have not even the status of other tenants who ordinarily contribute indirectly to municipal expenses.

Thus the municipalities have been very loath to assume any responsibility for these residents. The provincial governments have not seen fit to adopt them as their charges and the federal government refuse responsibility on the ground that they are not Indians.

Even before the advent of the great era of depression, the problem of the Metis was becoming acute. As more and more land was put into crop, as wild lands where a little hay could be put up became more and more curtailed, as wooded lands where fuel or fence posts could be cut receded, and as increasing restrictions were placed on hunting, trapping and fishing in the interests of game conservation and wild life preservation and as restricted areas were extended, the half breeds found it increasingly difficult to wrest a living from their surroundings. With the depression deepening during the past decade and with no government willing to assume responsibility for them, the problems of the Metis increased literally tenfold and they are problems that will not solve themselves with the return of normal conditions and better crops, especially for those who reside in the cultivated southern sections of the three prairie provinces.

As a result of this situation the Metis, during the past decade, have been living in almost indescribable squalor and poverty. Two or three years ago a relation of the conditions was shown by a visit to the Metis on the borderline of actual starvation which the municipality could not relieve because of its financial condition and the necessity of taking care of its own taxpayers; that a dozen or more were sleeping on bare earth floors in a single room; that they were three or four to a room; that they were in a municipality and it was pointed out that existence under such conditions could do nothing else than breed disease and immorality.

Should Be Settled

At the time of writing the Metis have not released for publication the 15 point program which they drafted as a memorial to the federal government, so that it is impossible to say what is their own solution of the problem.

It appears, however, that it is a problem which must and should be solved, not only in the interests of the half breeds themselves, but in the interests of all whom they contact, at a joint conference between Federal and provincial authorities.

What such a conference would decide as the proper solution of the problem can only be a matter of conjecture, but, in view of the type of life to which they are best suited, it would seem advisable that reservations be created for them in the northern part of the provinces where they could live under conditions which would enable them best to care for themselves. In any event the Metis are in need of immediate and effective action, especially in the light of the self evident fact that improved conditions for others will be of little or no benefit to the Metis population.

A Remarkable Insect

The common house spider has six spinnerets, each of which is covered with tiny spinning spools, and out of these come jets of liquid silk, hardening instantaneously on exposure to air.

Worked Separately

Curiously, two men, working independently, calculated the location of the planet Uranus, and reached identical conclusions. The planet was discovered where they predicted it would be found.

Nearly one-fourth of the people of England have moved into new homes since the World War.

Since it is a star, the sun is used by scientists as a laboratory in their studies of other stars.

Best qualities of velvet may cost as much as \$100 a yard, since velvet varies in value.

Magnificent Gift

Viscount Nuffield Donates Large Sum For British Troops

Viscount Nuffield, automobile magnate and philanthropist, announced his intention of contributing 1,000,000 shares of Morris Motors for "improving the facilities for recreation and enjoyment of the militia, Territorials and other forces."

His gift, worth approximately £1,500,000 (\$4,500,000), was revealed in a letter to War Secretary Horne-Belsham. It is intended, Lord Nuffield said, as a "permanent memorial to the spirit which animates us today."

Lord Nuffield has given away £13,000,000 (about \$40,000,000) in the past few years, his benefactions extending over such a wide range as gifts to Oxford University, an iron bridge to every empire hospital that wanted one, and large sums for rehabilitation of distressed areas of Britain.

In his letter to the war secretary, Lord Nuffield said he had been greatly impressed by the wonderful response to the national appeal for voluntary recruiting."

"No less remarkable," he added, "has been the willing acceptance by all classes and parties of the principle of universal service, calling for equal sacrifice."

His letter said he was anxious to make "some personal contribution towards the comfort and well-being of those men who are giving up, even temporarily, the ordinary course of civil occupations and home surroundings in the service of our country." The gift will be administered by trustees.

Under British Rule

Chaplain On World Cruise Impressed By What Saw

Back from a trip around the world, Rev. Father Wilfrid Langlois is impressed with the beneficence of British rule. His opinion is based mainly on what he saw in Egypt and India.

The pastor of St. Rose de Lima was chaplain on the world cruise of H.M.S. Empress of Britain. He touched at many ports and had an opportunity to see some impressions of what is going on in the different corners of the world.

As Fr. Langlois explains, the British have done a good job and their rule has been beneficial—Windsor Star.

Entirely New Method

Machine Shells About 900 Pounds Of Walnuts An Hour

A new method of shelling walnuts recently developed at the University of California, uses an explosion to burst the shells. The shelling operation, which is done by machine, consists of passing the walnuts over a circular saw which cuts an opening through the shell, blowing explosive gas-air mixture into the nut, and finally passing the nut through a flame which explodes its gaseous content. This method of breaking shells avoids fracturing the nut meats, which are not affected by the explosive. The machine in which this series of operations is accomplished opens about 900 pounds of walnuts per hour.—Scientific American.

Robins Use Airplanes

Build Nests In Machines On Airfield In England

A recent report from Denham in Buckinghamshire reveals that the robins there persist in building their nests in the airplanes on the local airfield. Possibly this is merely the result of advanced educational ideas among the robins who hope to render their offspring "air-minded" at an earlier age than usual; or perhaps, although which case they have begun to hanker after the delights of more luxurious travel, and so have evolved this happy scheme, whose slogan is, no doubt, "Stay at home and see the world."—Christian Science Monitor.

Ludovico, Duke of Milan, was so fond of fresh fruit that he invented a travelling fruit garden, so that he could bring fruit from the trees brought directly to his dining table.

Big Bertha, long-range gun of the World War, would have a range of 2,200 miles on the moon.

Trips To Mars

Edmonton Professor Puts Damper On Flight To Old Planet

Wars of the world, trips to Mars, rockets to the moon—Utopias created by Jules Verne and H. G. Wells—were punctured in a 10-minute speech by an Edmonton professor before the Royal Society of Canada at Montreal.

Dr. J. W. Campbell told a group of Canadian savants it would take the work of a giant mountain like Mount Robson to carry any earth-dwellers to the earth's satellite, the distant, bland, affable celestial body, theme of countless love songs through the centuries.

In meticulous scientific terms he perched the legend of the rocket to the moon, and tore the ground from under the feet of the Utopia writers. "For every pound of matter required to launch a trip 1,000,000 tons would have to start out to provide mass for speed control." Dr. Campbell said.

He explained his paper had arisen from an alleged recently-made statement by an astronomer that "the possibility of travelling to the earth's satellite in a rocket does not seem so remote any more as the realization of the television dream did less than a century ago, considering the scientific principles involved."

The Queen's Parasol

The return of the parasol which has been prophesied won new approval when it was learned that Queen Elizabeth had one made especially for her trip to America. This parasol is said to match one of her full-length garden party dresses and has a cane handle studded with rubies and sapphires. The cane was presented to the Queen by an Indian prince.

Science now knows everything except how a woman can keep on sweeping up more dirt when no more is brought in.

A Growing Industry

Cultivation Of Soyabean In Canada Becoming More Important

During the past few years the soyabean has been finding a place in Canadian industry and its cultivation is today an established factor in Canadian farming. The most important products of vegetable oil seeds are oils and meals, which in turn become raw materials for many useful commodities.

Today, Canada is to a great extent dependent on foreign sources of supply for vegetable oils and meals. About \$15,000,000 leaves this country annually for vegetable oil-seed products which could very well be retained here to benefit Canadian agriculturists. Both the federal and provincial governments have for some time been acclimating native grown soyabeans and many varieties are now available and suitable for localized soil conditions.

It has been definitely proved that Canada can produce soyabeans in commercial quantities, in fact the soyabean crop last year in Pelee Island, Ont., alone was valued at more than \$35,000.

Radio Affects Homework

Offers Too Many Distractions Opinion Of Australia's Teachers

The Australian Press Union says Victorian and New South Wales education authorities are concerned at the effect of radio on homework. A New South Wales officer questions whether the home now has a suitable atmosphere for homework because many parents wish to listen. Teachers are using this as one argument for a general reduction in homework. They say that the distractions at home are such that secondary school children cannot possibly do all the lessons set.

A severe, first-rank earthquake occurs about every 18 days, usually under the ocean.

Collecting From Spain

Italy Will Accept War Materials In Payment For Services

Italy is preparing to collect war debts from Nationalist Spain by accepting Spanish materials valuable in munitions making, a reliable informant said.

The total owed by General Francisco Franco for aid to the Spanish Nationalist cause is said to be approximately 10,000,000 lire, (about \$500,000,000). This does not represent cash advances but airplanes, guns, munitions and other supplies.

Italy is said especially to want iron ore in return.

Italian plans are to exploit the ore reserves with Italian technicians, and possibly laborers, and to transport the ore in Italian ships.

An Italian-Spanish combine already has been set up to take care of Spain's mercury output. Since Italy and Spain are the main mercury-producing countries, the firm will control a great part of the world's mercury.

Self-respect governs morality; respect for others controls behavior.

MODERN BUSINESS Offers Attractive Remuneration to Garbutt-Trained Men

Every summer the demand for clever Garbutt-trained young men is in excess of the supply. Last week I filled eleven excellent office positions—all calling for young men. This week I have to report no one immediately available for three more. This is a challenge to bright young men just out of High School to invest a small amount in specialized training to earn large salary rewards. Don't waste valuable time enrolling for Summer School.

SUMMER SCHOOL

"Once upon a time" it was unorthodox to go to school in summer. Like having pie for breakfast. Now both are just as you choose. Adults who are thinking for themselves are swelling the ranks at Garbutt Summer School and are three months ahead. July, August and September are excellent study months. Cool, airy classrooms. Excellent instructors. Long cool evenings. Recreation grounds at Bowmans and Banff.

Young men need to be competent machines operators enabling them to hold important office positions.

Of interest to rural dwellers, too, is the announcement that the School of Community Life will once again be in session at Oida from July 3 to 15. The courses include international affairs and current history, co-operation, rural sociology, dramatics and home making. Any person between 17 and 70 is invited to attend. Opened first in 1937 as an experiment in adult education, the School of Community registered an immediate success. Classes are held in the agricultural school at Oida.

WE ALWAYS APPRECIATE THEM

The other day we asked a man for his printing and he told us:

"Oh, our printing doesn't amount to much. All we have is a few small orders, and none of them ever run into anything that looks like money."

Those little orders are the kind that make our business.

Most of our business is in printing letterheads, envelopes, circulars, posters, office forms, and other small orders.

We appreciate a small order as well as we do a big one.

So, if you have any small orders for printing we want you to know that we are glad to get them. We appreciate them just as much—and take just as good care of them—as if they actually amounted to hundreds of dollars.

The Gleichen Call

Town & District

The local high school ball club lead by Screwball Tarzan and Latfoot defeated Standard high school to the tune of 13-5 last week. The mighty Tarzan smacked out a home run to bring in three men and gained a convincing lead.

You should try a Call want ad. It does not cost a fortune and will help you to sell, buy or what have you.

A meeting of the congregation of St. Andrew's Church will be held on Wednesday evening June 14th, at 8 p.m. in the church. All members of the church are urgently requested to be present as important matters are to be discussed.

Mr. and Mrs. R. B. Hayes of Gleichen, announce the engagement of their youngest daughter, Viola Balphum, to Mr. Elmer Bollinger, eldest son of Mr. and Mrs. M. Bollinger, also of Gleichen. The wedding will take place in July.

Marking its eleventh anniversary, The Financial News of Vancouver has issued a 5-page special supplement to its regular issue. Reviewing in detail the progress of individual provinces mining and oil companies during the past year and including as well sections relating to the lumbering and manufacturing industries this year's special number of The Financial News has broadened its scope considerably. Included in the issue is a considerable amount of information concerning Alberta. Printed on book paper and copiously illustrated, the edition should be especially useful in conveying to persons elsewhere a comprehensive review of the resources and the recent progress of Western Canada.

Because of a parasite that attacks seed peas in almost every canning district on this continent cannot survive the Alberta's climate, seed peas growing has become a new prairie enterprise with a payroll of over \$20,000 a year. The growing of pea seeds is a carefully regulated business necessitating weekly inspection of the fields and extensive irrigation. Every seed grain is picked by hand and inspected for flaws before being sold. Collection of the peas on irrigated land allows remarkably accurate estimates of the yield to be made in advance. Half is the only remedy to the raising of a successful crop, the threat of root-rot and seed rot, which previously prevented peas growing in Alberta's cold soil, having been over come by treating the seeds with mercury dust disinfectant before sowing.

UNITED CHURCH

ST. ANDREW'S CHURCH

Services for June 11th.
Morning service 11 a.m.
Rev. Geo. W. Lang, B.A., (Incumbent).

CREAMED HADDOCK IN POTATO NESTS

2 cups medium white sauce, 2 tablespoons gherkins, chopped; scraped onion; 2 tablespoons chopped capers; 1 tablespoon parsley, minced; lemon juice; 1½ to 2 cups chicken haddock. Add capers, gherkins, parsley, onion and lemon to white sauce. Add the chicken haddock which has been heated and is very hot. Serve in browned mashed potato nests, or use in fill hot flaky tart shells. Serve very hot with green peas and sliced beets. They make a most delicious luncheon or supper main dish. Potato Nests: Prepare mashed potatoes in your usual way, adding one slightly beaten egg yolk for each two cups of mashed potatoes. Drop by spoonful on a greased pan and shape with a spoon, with a deep hollow in each. Brush with melted butter and broil delicately in moderately hot oven of 375 degrees.

In spite of the general spread of knowledge, many myths concerning the habits of animals are still believed, and from time to time statements are issued contradicting these popular superstitions. One of these statements recently related the belief that a porcupine when attacked protects itself by shooting its quills forcibly at its attacker. The fact is that the animal defends itself principally with its claws from its strong barbed tail, but the quills are not lost except through rough handling. Similar denials have been made with respect to hoop snakes, joint snakes and the like, whose suppo-

ed peculiarities are only imaginary. It is likewise untrue that the ostrich hides its head in the sand upon the approach of an enemy, but the figure of speech has become so firmly established that it will doubtless continue to be employed for a long time to come. There are many credulous people in the world, who will accept almost any wild or strange supposition. A good many still believe that a horse hair placed in a rain barrel will eventually turn into a snake.

Have you any news to tell the editor or if so be will be glad to publish it. In case you do not happen to meet him on the street use the telephone or the mail. You will be helping make the local paper of greater interest and thereby serve the general community. Whatever news may interest you, must surely interest others.
